## Introduction

### Get Paid for your Opinion

Just in the United States, companies spend over 250 billion dollars a year trying to convince consumers to buy their products and services. The majority of that is spent on advertising, but a significant portion is spent on research. Understanding consumer behavior, like how people think and shop and why they buy certain products, ultimately helps companies improve their products and services and make them more money. Your participation in giving your opinions on different research surveys directly influences the way companies develop products, services and policies, to better meet the needs of consumers. Knowing that they won't get your help for free, companies are willing to pay people like you good money for their opinions, because they know they will generate even more profits for themselves.

Companies will pay you \$5 to \$50 just to fill out simple online surveys from the comfort of your own home! Get paid \$35 to \$85 for participating in focus group panels for 30 to 60 minutes! Have new products sent to you before they are released on the market. Test them out, give your opinion, and get paid (you get to keep the free products too!).

### Get Paid To Shop and Eat Out

Companies are willing to pay you to visit their place of business, and act like a normal customer. These companies will pay you just to spend some time browsing their stores, because they need an honest opinion from an everyday consumer on how well their facilities are doing. You help them with your honest opinion, and they pay you for your time.

Several companies will send you assignments by email. You can read over the assignment and decide whether you would like to accept it or not. Just email or call them back and let them know!

Stores aren't the only ones willing to pay you for your time. You can also receive assignments from amusement parks, movie theaters, etc. And not only do they pay you, but they let you use their services for free. Several large restaurants and fast food chains pay you and let you eat as much as you want for free!

### Get Paid To Drive

Mobile advertising is among the newest and fastest growing forms of promotion. Cars have been proven to have great visual exposure and marketing presence. Companies are willing to pay to have their advertisements placed on a car. They will not only pay you for the regular use of a vehicle, but they will also pay you by the hour to drive specific routes up to 6 days per week.

You can get paid anywhere from \$10 to \$35 an hour.

### **Get Paid To Read Emails**

You are already doing these tasks everyday, so how about you start getting paid for them? Many websites will pay you to do what you are doing right now - using the internet.

Where do these websites get the money to pay you? Advertisers pay these websites to show their ads, list their products, etc. The websites, whom the advertisers are paying, understand that the more users they have, the more money they'll make. So they usually share 50% to 75% of this revenue with their users (you). You can imagine how much money you can make by just sitting at your computer, reading emails and visiting websites!

## Get Paid for your Opinion

The links below will direct you to the survey company pages, where you can sign up for the various survey programs and get paid for your opinion!

Every time there is a survey available for you to participate in, the company will notify by email. Each email invitation will contain all the information you need to participate in that survey (link, reward, estimated time it should take you to complete the survey, etc).
